VIDEO HARDWARE SERVICES LLC

PRESS RELEASE

videohardware.com ships new workstations

New systems debut to coincide with new software releases

Manchester, NH November 26, 2011: Video Hardware Services LLC has announced availability of their latest DreamStation workstation for the professional video editing market.

The release is based on Windows 7 64 bit and latest Intel Socket 2011 Sandy Bridge Extreme platform. Socket 2011 offers significant improvements over the previous Extreme platform. New features include native SATA 6Gbps, native USB 3.0, 4 channels of DDR3 memory, reliable over-clocking, SSD Caching and much more.

According to Blaine Holm, a principal owner, "the new platform will significantly enhance the productivity of our customers through native 64 bit support with 64 bit software solutions from all the major manufacturers. We are entering an era of unprecedented performance. Our goal has always been to provide professional solutions to our customers that make them more productive at a reasonable price, and this new platform reaches that goal."

The new DreamStation series support Adobe Creative Suite 5.5, AVID Media Composer 6, Grass Valley EDIUS 6, and Sony Vegas Pro 11. System options include I/O options from Matrox, AJA, AVID, and Grass Valley.

Systems can be purchased now for delivery in 7 to 10 days.
